NURSING INFORMATICS

I USED TO THINK.... NOW I THINK

ELECTRONIC HEALTH RECORDS (EHR)

I thought EHRs were just digital folders that nurses used to type patient notes.

I now understand EHRs are powerful tools that support clinical decisions, reduce errors, and improve care coordination.

Computer systems in hospitals were only for administrative work like scheduling or billing.

Computer systems are integrated into patient care—from monitoring vitals to managing medications.

COMPUTER SYSTEMS & DECISION SUPPORT TOOLS
